WASTE COMPACTING CONVEYORS

FILTRAMAS, S.A. has a wide range of solutions for the transport and compacting of the waste extracted by its machines, in a clean and discreet. The conveying and compacting systems can be with screws with final draining zone or hydraulic presses.

The **conveyor-compactator screws** supplied by **FILTRAMAS, S.A.**, coupled together with its equipment, allow us to obtain a totally clean and fair-faced installation. The screw loading openings are designed for coupling to the discharge opening of the extraction equipment (bars movable grilles or screens), and the intermediate spaces are covered by a fairing.

- **Screws Conveyors TT and TP**
- **FP Compactor**
- **Screw Sifter Model TTP**
